WILD WILD SEARCH®

Chief Data Officer (H/F)

Our client

We are recruiting for our client, a CAC 40 company, leader in benefits and rewards services, their Chief Data Officer.

Key Responsibilities

In order to leverage the evolutions arising in its business environment and prepare the future, the company is conducting its global digital transformation. Become a Data Driven Company is one of the key pillars to achieve his ambition.

The Chief Data Officer will be responsible for Data strategy definition and execution across Benefits and Rewards activity. He/she will be in charge to oversee data management and governance across the company and understand how data can be leveraged to create business value.

Your Missions

Your main tasks & responsibilities as a Chief Data Officer will be :

Data Management, Data Architecture & Data Governance

Focus on business capabilities of the data, sharing with organization what it could be used for
Define and execute a data roadmap that delivers incremental business value
Ensure data is available, consistent, reliable, accessible, secure and timely to support the mission of the organization
Lead data management and data governance across the BRS
Define and implement data uses case at global level
Find ways to optimize data management costs and investments while increasing value of data available
Improve data integrity and measurements of data quality, within the legal requirements (GDPR)
Set an optimized Data architecture, maximizing Data platform implemented at Group level

Foster a Data Oriented culture

Act as collaborator and communicator to help align BRS functions in a common vision for their data strategies and platforms, to drive digital transformation and meet business objectives
Prepare the relevant documentation for Business Reviews and/or the Executive Committee when necessary
Create and animate a transverse data community
Contribute to foster a data-drive culture

Profile

Data Scientist / Data engineer with more than 10 years of experience in Big Data / Data Sciences, including a similar role experience in another international company
Deep knowledge of data architecture
Strong business acumen
Strong project management mindset
Knowledge of Microsoft Azure Data platform (recommended)
Strong negotiation and communication skills, demonstrated interpersonal and influencing skills,
Capacity to convince and explain
Drive, energy and leadership,
Ability to work transversally
